**WARNING AND DISCLAIMER OF LIABILITY**

The Flood Damage Prevention Ordinance for the Village of Ruidoso, New Mexico became effective January 1, 1975. Its intent is to minimize public and private losses due to the dangerous misuse of floodplains in the Village of Ruidoso. A Floodplain as defined in the Ordinance is any land area susceptible to being inundated by water from any source. Depending on the location of your property it could possibly be inundated by greater frequency flood events (those occurring more often). A flood greater in magnitude than the 100-year flood could also occur. The review your use has undergone is solely for the purpose of determining if your application conforms to the written requirements of the Flood Damage Prevention Ordinance for the Village of Ruidoso. It is not to be taken as a warranty. Compliance with this Ordinance does not insure complete protection from flooding. The Flood Damage Prevention Ordinance meets established standards for floodplain management, but neither this review nor the Ordinance take into account such flood related problems as natural erosion, streambed meander, or man-made obstructions and diversions all of which may have an adverse effect in the event of a flood. You are advised to consult your own engineer or other expert regarding these considerations.

I have read and understand the above WARNING AND DISCLAIMER OF LIABILITY.
